

## Helsinn Therapeutics – Discontinuation of Truseltiq<sup>®</sup> (infigratinib)

- [Helsinn Therapeutics recently announced](#) the discontinuation of [Truseltiq \(infigratinib\)](#) because of difficulties in recruiting and enrolling study participants for the required confirmatory trial. The discontinuation is not due to safety or efficacy reasons.
- Helsinn Therapeutics will discontinue distribution of Truseltiq capsules in the first quarter of 2023 and is now ending all promotional and educational activities. Product will be available until March 31, 2023.
- Truseltiq is indicated for the treatment of adults with previously treated, unresectable locally advanced or metastatic cholangiocarcinoma with a fibroblast growth factor receptor 2 (FGFR2) fusion or other rearrangement as detected by an FDA-approved test.
  - This indication was approved under accelerated approval based on overall response rate and duration of response.
- Helsinn Therapeutics strongly recommends against health care providers starting new patients on Truseltiq.
