

### Emend® (aprepitant) – First-Time Generic

- On December 29, 2016, Sandoz launched an [AB-rated](#) generic version of Merck's [Emend \(aprepitant\)](#) capsules.
- Emend, in combination with other antiemetic agents, is indicated in patients 12 years of age and older and patients less than 12 years who weigh at least 30 kg for the prevention of:
  - Acute and delayed nausea and vomiting associated with initial and repeat courses of highly emetogenic cancer chemotherapy (HEC) including high-dose [cisplatin](#)
  - Nausea and vomiting associated with initial and repeat courses of moderately emetogenic cancer chemotherapy (MEC)
- Emend capsules are also indicated in adults for the prevention of postoperative nausea and vomiting.
- Emend is also available as a brand [oral solution](#) and brand [powder for injection](#). Refer to their respective drug labels for specific indication information.
